“Reserved by \_\_\_\_\_” means NOT  
AVAILABLE.

Someone else has already put their money down.

If you’d like to be that someone next year when someone looks  
at these lists, YOU can reserve a baby in advance by going to  
“Advance Baby Sales.”

Thank you for looking!

*What will they think of next?*

*20 years ago, I was at a show in Ohio and a man came up and introduced himself to me. He said: “thanks for sending me your sales list. I have to do chores and milking before I go to work in the morning. I couldn’t buy any of your goats because they give so much milk that I would be late for work.”*

We can't get the paper from ADGA until we come up with a name that contains "R" and has something to do with her family.

"Confirmed Pregnant Price" What does that mean?

We send samples to the lab every week or two. If the doe you are buying is pregnant, then you are getting more Saanens than just her (unless she aborts.)

"331" – What does that mean? She is wearing a neck tag that says "331."

Also her left ear PERMANENT tattoo will read "31R."

The "R" means born 2023.

The "331" means she was the 31<sup>st</sup> kid born in 2023.

The first digit in her tag -3- just means she was born in 2 0 2 3

*WHY ARE PERCENTILES MORE IMPORTANT THAN TOP TEN?*

*We have a whole long article that explains that. Call if you want one. But here's something we can say in two sentences:*

*"LOOK AT THE ASTERISKS! (On the Top Ten List) The computer is telling you that it sees a weird 'deviation.'"*

**EVERY SAANEN ON THE TOP TEN LIST HAS AN  
ASTERISK - EXCEPT THE CAPRIKORNS**

*Here's something else we can say in two sentences:*

*"Top Ten measures Management.  
Rank, or percentiles, measures GENETICS."*

*You can't buy management but you **CAN** buy genes.*

*All of these doelings HAVE been registered with ADGA.*

If we have time to put the page numbers on, that's where you find her dam in the particular Family.

PTAM 729 as of July 2025: 99<sup>th</sup> %ile! Teats pointed out.

NAUGHTY has the highest PTAM in the USA,, 100 lbs higher then the second doe.

**01-10 305 days 5,258 lbs 199 3.8% 147 2.8%**

NAUGHTY's dam CUMIN also broke 5,000 (5,142). *If ROSEMARY gives you a buck kid, he will throw more milk than your current herd sire.* .

We used her full brother RAISSIN as a main herd sire in Fall 2023 AND 2024.

---

Pregnant price \$13,900

She has The Double Whammy- Milk & Conformation. Judge Kyle Miller made her first of like 20 Yearling Milkers and Judge Scott Bice made her first of 3. These are judges that respect capacity. Two other judges made her last of 3 at MDGA.(A 3 ring show) These are part of the new wave of "4-H Never Been On Test Judges" They want the mammary to be smaller in relation to the body. 75% of what they want is flat rump angles and great fore udders. For this same reason we will not take her to the Nationals in 2024.

On July 1 someone bought ROSEMARY'S dam NAUGHTY so we increased ROSEMARY'S price by \$2,000 because there will be no more NAUGHTY dau's for us.

Protein % is poor at minus .14.

One of 5 or 6 milking yearlings who will probably end over 3,000 lb in 305 days.

Did not freshen until May 29, 2025.

338 vs. 339 - teat placement is a BIG issue with Scott and he gives 338 the edge but they are dry.  
338 has the advantage in Rump Angle. 339 is slightly bigger, more width between the front legs,  
more power but both are strong. 338 is a tad hocky but she is the showier of the two, possessing  
more style and slightly better back feet.

DE LE FROMAGE **TOP TEN** by NET SPICE

We are using RENNETTA's full brother RENNET as a herd sire. Both RENET and RENETTA Butt Ugly per Scott. Also any buck we use will make the sons and daughters prettier.

NET SPICE is the second highest PTAM of any Saanen. But he is too narrow in the rear for Scott.

**One of America's 14 99<sup>th</sup>ile Does. The Top Ranking.**

A new 99<sup>th</sup> percentile Doe on the new Aug 2024 USDA DHIA Evals

A wonderful choice for a dairyman, because:

1. Even though we are not show breeders, we will never use her son here, co we can afford to let her go.
2. The show people don't want her because she is butt ugly by their standards. She's a little uneven and has a sloping rump. From their point of view the mammary is too big for the body and does not have enough support.
3. But she has plenty of fore and plenty of rear and plenty of milk. From the point of view of an Amish Dairyman, "She has the biggest bag of any of Scott's yearlings."

Scott's analysis as of Nov. 2024: "If the mammary is truly defective, how did the USDA computer make her one of the top 14 does in the U.S. based on milk/fat/protein? Now, if she breaks down, the computer will change it's rating. I did downgrade her price from 6,755 based on the uglies."

We always have to go out to get an out-cross buck. If we don't, the herd becomes too inbred, losing size and production, as well as creating other problems. So each year, Scott goes through the USDA records, focusing on the 99<sup>th</sup> %ile does and writes letters asking "Is (name) still alive? If so, who is she bred to? How much are you asking for the first buck kid?" One year, we were fortunate enough to find SARAH in California. Not only was she a 99<sup>th</sup> %ile doe but she also had an LA-91. NAUGHTY is actually better than her USDA rating. She wears 1127. Stary wears 1123.

NAUGHTY was cruising at 16, 17, 18, 19. STARY was doing 12. The tester got them switched.

NAUGHTY's first 3 tests THIS year are 22.0, 26.1, 28.8. She is running way ahead of her 1yr and 0 month lactation, which was last year.

**28.8 is the most milk anyone has ever made at CAPRIKORN in 40-some years of continuous DHI.**

When her buyer moved her out of the Caprikorn Farms trailer and into their trailer, Scott and Danny, the buyer's assistant, watched as she drank 3 ½ gallons of water. Scott said he has never seen anything like that. 3 ½ gallons of water weighs 28 pounds; that seems impossible, but you can ask Danny!

ZEPPPO's dau's are BIGGER, AND THAT IS IMPORTANT TO US. Because a 16 lb milker that is small is more likely to give a dairy farmer health problems. But a 16 Lb. Milker that is BIG can handle it.

ZEPPPO is Mr. Protein. He has the second highest protein % of any of our bucks, ever. The winners of the Four Milk and Fat Awards at the 2016 Nationals were both ZEPPPO dau's.

EZTAR has a very nice rump angle which comes from her granddam SGCH CAPRIKORN RAMESES VVS1, LA -91 2x and 6 3,000+ lactations.

We actually showed EZTAR as a 3 y o in three rings and she was last in two of them but the competition was two great show herds- Scotty Broaddus (araby) and Janice Kessler - C CREEK SAANENS.

Summer of 2019-As a five year old we dragged her out again and she won her very small class every time on August 3. The judge in the last show was a dairy farmer and made her RESERVE GRAND CHAMPION over JWALA!.

RAZTAR is Scott's choice for a serious Saanen breeder that would also like to ship milk profitably.

Not ugly; not a show doe...YET! Rump angle will flatten with age. Shallow heels.

On December 1, 2023 Scott said " Has some style, also shoulder motion, & the big arc.

No use looking at her lactations, one side of mammary ruined. Computer knows her relatives. So computer knows her percentile is 98!! Better genes than 49 of 50 Saanens. Most dairy farmers don't understand "GENES." So they don't buy her kids. So we have a lot of kids left here and they are doing great for us. But we tell you all of the bad stuff as well as the good stuff and RENETTA is butt ugly.

Teats too short for our hand-milking customers. The judges will never like this mammary because it's too low slung in the back and for the American Showgoat Association, it is too big for her body at 2 years old. There is plenty of floor and it's perfectly symmetrical. She could end up in the middle of her class in a county fair. But she would be last in her class at Nationals. On the minus side, those are barely two and a half finger teats. They are certainly not 3 finger teats. And with the medial being a little weak, they are pointing out very slightly.

*Is there a milkier pedigree of any doeling in the United States?*

On May 21, 2024, Scott said, "Only weighs 49 pounds. So how can she show us a big lactation?"

366 only weighs about 62 lbs in September of 2024. So it is hard to see how she could have a lactation big enough for the USDA formula to rank her as one of the 99<sup>th</sup>%ile does but it did.

Does this mean that she will turn in a huge lactation when she finally grows up?

We will price her babies really high.

They will stay here because 9 out of 10 dairy farmers don't understand percentiles. 9 out of 10 dairy farmers are looking for a 4,000, 4,500, or 5,000 lb lactation which is completely impossible when you weigh only 65 lbs. In using this method our production will increase one generation at a time because the dairy farmers that do not choose to educate themselves about PTAM's and percentiles will buy the wrong Saanens from us.

06-11 she opened up with 18.4 on march 23, and April 20. As of May 5 when we are updating this, we don't expect her to do 4,000 even though the computer thinks that. Because seven year olds don't keep going like younger does do.

Both HABANERO and HARISSA 99<sup>th</sup> %ile as of June 2020.

HABANERO's buck kid #8206 was by far the best looking baby buck. Scott mourned when he let him go for only \$1,995. But the repeat buyer had bought many Saanens from us so the buyer deserved a reward.

When you do the math as explained in "Elite" on the ADGA website as of December 2019, HABANERO has the highest total score. That means she has the genes to bring in more of a milk check than any doe in the US.

Therefore her kids are overpriced from the perspective of a commercial dairy farmer. On August 4, 2018, even though she was only a 2-year-old, the judge made HALLOUMI Grand over an AOP class of around 17 does. September 15, 2018 - HALLOUMI goes Grand vs. 14 for her second Leg. HALLOUMI got dragged out to five shows a year by Alice. One per month in the Summer. Each time her DHI projection drops because she is bagged up. 2022 Howard County MACAROON wins 2yo class vs. two National Show herds wins the three year old class June 4, 2022 at Dist. 3 Saanen specialty, then goes RESERVE GRAND

DDD: CAPRIKORN HOT KANDY - basically the 2<sup>nd</sup> showiest doe at CAPRIKORN in Summer of 2023. Her milk rating fell from 95<sup>th</sup> when bagged up 4 times each year.

A deep pedigree for milk with quite a lot of conformation thrown in.

As of July 2024, she has not freshened, but Scott said: "Going to be a very good or excellent mammary, but the shoulders are loose."

A National Show Judge was here on Nov. 27, 2024 and placed GUMDROP 3<sup>rd</sup> of 21. Of course she just freshened August 4th.
