## 2024 Does for Sale

September 29, 2025

In NEW CF/2024: 2024\_Does\_for\_Sale

**These are Doelings born in 2024.**

Please open **"2023 DOES FOR SALE."**

If you want one, send a deposit of 10% (or a \$100 minimum) and a contract2

\*Contract2 is behind the button, "Order Forms," on the website.

Or call us (301) 834-8030 and we will fill it out!

**ATTENTION PLEASE!**

*We are going to change these prices soon!*

*These prices change all the time. **Once you make your deposit, your price never changes.** Until you make your deposit, you have no deal.*

THANKS!!

“Reserved by \_\_\_\_\_” means **NOT  
AVAILABLE.**

Someone else has already put their money down.

If you’d like to be that someone next year when someone looks at these lists, **YOU** can reserve a baby in advance by going to “Advance Baby Sales.”

Thank you for looking!

*What will they think of next?*

*20 years ago, I was at a show in Ohio and a man came up and introduced himself to me. He said: “thanks for sending me your sales list. I have to do chores and milking before I go to work in the morning. I couldn’t buy any of your goats because they give so much milk that I would be late for work.”*

We can't get the paper from ADGA until we come up with a name that contains "S" and has something to do with her family.

"Confirmed Pregnant Price" What does that mean?

We send samples to the lab every week or two. If the doe you are buying is pregnant, then you are getting more Saanens than just her (unless she aborts.)

"431" – What does that mean? She is wearing a neck tag that says "431."

Also her left ear PERMANENT tattoo will read "31S."

The "S" means born 2024.

The "431" means she was the 31<sup>st</sup> kid born in 2024.

The first digit in her tag -4- just means she was born in 2 0 2 4

*WHY ARE PERCENTILES MORE IMPORTANT THAN TOP TEN?*

*We have a whole long article that explains that. Call if you want one. But here's something we can say in two sentences:*

*"LOOK AT THE ASTERISKS! (On the Top Ten List) The computer is telling you that it sees a weird 'deviation.'"*

**EVERY SAANEN ON THE TOP TEN LIST HAS AN  
ASTERISK - EXCEPT THE CAPRIKORNS**

*Here's something else we can say in two sentences:*

*"Top Ten measures Management.  
Rank, or percentiles, measures GENETICS."*

*You can't buy management but you **CAN** buy genes.*

*All of these doelings HAVE been registered with ADGA.*

If we have time to put the page numbers on, that's where you find her dam in the particular Family.

**CAPRIKORN EXTRACT SWISS** #409 AS2351315 Born 01/8/24  
American Saanen  
Page 1 - SWISS's Sire PRIDE OF EXTRACT

SS:LEEANN'S SON

\*Proven at Plus 286 pounds with a very good reliability at 57 as of October 2024

\* His dam is a 92, but his sire is minus for build.

S: CAPRIKORN LS PRIDE OF EXTRACT

SD: SG CAPRIKORN STARBY EXTRACT. #3 Doe in U.S. #490 Long Teats, pointing slightly IN.

01-11 305 **4273** 134 3.1% 119 2.8%

03-11 305 4221 126 3.0% 121 2.9%

And EXTRACT had a strong lactation curve, dairy-wise. On the November 2018 test, she led the entire herd even though she freshened February 5<sup>th</sup>!

Here is a letter from the buyer of CAPRIKORN STARBY EXTRACT:

“High drama: April 3, EXTRA popped out Odin and Oscar, no drama although we had been worried about how thin she had become late in pregnancy... Shortly after kidding, it became clear there was a kid in the other horn that was stuck. Our DVM... heroically drove the 1.5 hours to see what was going on... and decided the kid was now dead, probably a torsioned horn, and the only way to save EXTRA's life was to do a c-section...

So EXTRA was... taken to Marion, MA for a c-section, a third buckling, which she tolerated well. We recovered her the next day, she was walking but just barely, and brought her back to the farm. She was too weak to stand to be milked, so we rigged up a block and tackle sling to support her during milking... we did supplement her with rumen bacteria to counteract the antibiotics she was on after the c-section.

Everyone learned how to milk her with the aid of the block and tackle sling and she continued to get stronger, although at one point she lost all her hair - an amazingly skinny, hairless, indefatigable old goat putting out close to a gallon of milk a day - never lost her appetite...nor her sweet disposition. She is now totally spoiled.

By August she was back to jumping up on the milking stand to be milked and at TEN YEARS OLD is still milking more than any other doe in the barn...

\*Note from Scott, October 31<sup>st</sup>, SWISS - known to us as “409” is really big, even considering that she was born January 8<sup>th</sup>.

04-08 324 4336 133 3.0% 112 2.6%

WIDEST udder in the herd. VERY IMPORTANT. You can't make them too low. You can't make them stick out in the back or they pee on them. So make them wide!

SARMA's front feet slant out. We have seen this before in about five does over the years. It sounds crazy but it usually straightens up.

Best Udder in Show versus 24 Milksters!!

S: CAPRIKORN CZARGATE HOT ROCKS #669 (Scott sent HOT ROCKS to the sale barn.)

**HOT ROCKS** for the dairy farmer that needs **UDDERS!**

Almost an NSBA type buck - dam beautiful mammary - especially fore. But dam did not finish 1<sup>st</sup> or 2<sup>nd</sup>  
at Nationals. **8th.**

SDS: CAPRIKORN SNOW BIZNES (LA-90) \*B

SD: CAPRIKORN BIZ FLASH OPAL #567- Showiest of the yearlings in Scott's opinion. #3  
behind FLORENCE #577 and FIRE QUEEN #529 at nationals. Also was having a very good baby  
lactation.

11.5, 11.0, 10.5, 13.5 then 3.5 Got Mastitis

projected at 3354 102 84 before mastitis then it killed her

SDD: CAPRIKORN DIAMONDS R4EVER

American Saanen 2 y o LA + VVV 86 too low, but then she is linebred

01-00 305 1945 69 3.5% 58 3.0% very good baby lactation

02-00 305 2739 104 **3.8%** 85 3.1% very disappointing milk-awesome components

03-00 299 3231 119 **3.7%** 96 3.0% IN PROCESS - that's better

Our long awaited line breeding on ROCKET. Four people spent 3 hours trying to pull this  
doe, and finally succeeded. So sad that she was bought and lives in Trinidad-Tobago  
now. See the ROCKET FAMILY.

D: SG CAPRIKORN ZECRET BAR EXAM \*M – Previous Page

DDDDD: **JUSTICE**

KUSTODY **TOP TEN** was the 4<sup>th</sup> highest milker out of 60 on our first test of they year, 2021, Feb.  
27<sup>th</sup>.

PERFECT for someone selling fluid milk! After 3 tests, her b.f. % is **5.3**. FAT TASTES GOOD! Buyers  
come back!

**IDEAL FOR DAIRY FARMERS!**

Conformation decidedly Unshowy. Keeps price down.

A fabulous mammary for a dairy. Teats straight down. But for the show people, the  
mammary is too big.

Page One - Her Sire, PROSECCO

SS: LEVI was very heavily proven before we paid to drive his son  
PROSECCO from CALIFORNIA to MARYLAND on the East Coast.  
Percentile 97-better production genes from 32 out of 33 Saanen bucks  
PTAM 363-Compared to the average Saanen buck with daughters on test,  
he increase production by 363 pounds in 305 days.

REL 62 Very good Reliability for production  
PTAFS **minus** 0.2-just slightly worse built than average.  
PTAFS REL 59 Pretty accurate rating for the minus 0.2

S: LEEVI PROSECCO-born in 2022; driven from California to CAPRIKORN.  
*Any buck we bring in from an outside herd will lower our milk! Why do we do it? Because  
otherwise we become too inbred and bad things happen in the offspring.*

SD: KARASI-**TOP TEN** from a small California herd that cares quite a bit  
about show so they cannot compete with us in milk. **LA-92!** Well built.  
90<sup>th</sup> %ile as of Nov. 2024 (out-milks 9 out of 10 tested Saanens).

M ALEX has the 4<sup>th</sup> best conformation in the herd.

151 BLUE M ALEX

DOB: 05/15/2020

Looking really good.

3<sup>rd</sup> of 7 / 6<sup>th</sup> of 16

NEW RED LINE

KEBAB x J ALEX

On Oct 8, 2022 Scott said “it’s a fabulous body and she has the top line that the show folks like. She has the massive ribbing that we milk folks like. We tell you all the bad things as well as the good things, and when she has been milked out, the teats are pointing out badly enough so that they can rub on the inside of the legs, although not really horribly like some does. Also her back feet turn out which is annoying but it probably helps with the big escutcheon that she has. On the plus side there seems to be a pretty decent foreudder extension and she’s very friendly and sometimes her natural stance shows us a really excellent escutcheon width between the hocks.”

On March 26, 2023 Scott said “It’s really a fabulous mammary socked up. Lots of fore 1/3 1/3 1/3 but, the problem is the teats are set too far out. They also point out slightly rubbing against the rear legs.”

M ALEX was 15<sup>th</sup> place out of twenty one 4-year-olds at the 2024 National Show in Louisville.

We are not a show herd. But it helps money wise if your great milker lasts for many years instead of breaking down or getting mastitis and being ruined when she is still 3 or 4 or 5 years old.

Overpriced to keep the New Red Line alive.

Her price will drop if the mammary is not great and if M ALEX gives us another daughter.

Does not want to get pregnant as of October 2024.

D: CAPRIKORN LS PARMESANA

DD: **SGCH** CAPRIKORN ZURICH HALLOUMI 4\*M #634 99<sup>th</sup> percentile LA-90  
HALLOUMI was the showiest of the yearlings as of June 2017.

Therefore her kids are overpriced from the perspective of a commercial dairy farmer. On  
August 4, 2018, even though she was only a 2-year-old, the judge made HALLOUMI  
Grand over an AOP class of around 17 does. September 15, 2018 - HALLOUMI goes  
Grand vs. 14 for her second Leg.

HALLOUMI gets dragged out to five shows a year by Alice. One per month in the  
Summer. Each time her DHI projection drops because she is bagged up. Surely she would  
have a 4,000lb lactation to her name if we had a different show doe in her age class.

3-11 526 7220 261 3.6% 218 3.0%

PTAM Plus 300!

We took her to one show but there were no other 3 y o 's entered.

She COMPLETELY outmilked all our 2 y.o.'s through August 2018!!

PROMENADE's brother, #215 and her sister, #216 had rear end assemblies that caused Alice and Scott separately to anguish when they saw them. So the genes for that trait are not good. The sire, WIN, has done this before and we don't use him anymore, even though his grand-dam broke 5,000 lbs. You wouldn't notice that the rear end assembly was narrow on this kid and she will certainly be bred to someone who has a big escutcheon.

PTAM Plus 463: That means you get 463 lb more milk in every lactation than the average TESTED Saanen. And more from her daughters and granddaughters, etc.

3/2/23 - A bodacious mammary for a yearling in terms of volume, but the teats are placed too far out on the sides of the mammary and definitely brushing on the insides of the back legs.

On May 21, 2024, Scott said, "Teats too small for our hand milkers."

On 9/29/24 Scott says, "PROMENADE was a 99<sup>th</sup> percentile, slipped to 98<sup>th</sup>. She is a half step from greatness. Rear is wide, but teats point out. I picked PROSECCO to suck up the medal. If it works, STRUTTER will be really valuable."

It worked! STRUTTER is very well built!

## CAPRIKORN PRO S'ALOHA Page 2

PELE, the dam of S'ALOHA

**CAPRIKORN HONDO PELE** #297 GS2325678 Born 02/28/2022  
Grade Saanen  
First 2-year-old tests: 16.8, 16.5, 15.1

SS: SG CAPRIKORN SNOW BIZNES (LA-90) \*B BIZ's PTAM of 300 and something was higher than any buck on the Elite Buck List as of October 2017.

S: CAPRIKORN FLINT HONDURAS \*B #609

SD: SG CAPRIKORN CZARGATE FLORENCE 6\*M **99th%ile**

March, 2015 one ear still down and folded. One of the appraiser's only 3 Ec kids on July 28, 2015. Best built of the three in Scott's opinion; has beautiful udder. 2016: Leetown Show, she beat our best looking yearlings in all 3 rings under 3 different judges. July 4<sup>th</sup>, 2016 4th place milking yearling at Nationals. July 4th 2016 ½ of the 2ND Place dam and dau at Nationals. She had it all. 99th PERCENTILE! Big butterfat. 4th place Milking yearling at Nationals.

D: CAPRIKORN UNKNOWN MAHALO (SIRE UNKNOWN)

DDS: CAPRIKORN ZEPO KENYA \*B #8141

KENYA is huge, but we want you to know our in-house judge placed him LAST of the 2018 bucks. We want SIZE because a 5,000 lb udder looks entirely stupid to the silly show goat people when it is attached to a medium sized body.

DD: CAPRIKORN KENYA MORE ALOHA 7\*M #120 BLUE AS2078491 96<sup>th</sup> %ile  
**top ten**

0-08 332 2574 80 3.1% 77 3.0% *Yes, she made 2500 starting at only 8 months old.*

2-00 309 3973 150 3.8% 128 3.2%

2-11 325 **4786** 158 3.3% 143 3.0%

More milk/fat/protein genes than 24 out of 25 TESTED Saanens.

Good looking enough so that Scott took her to Nationals. Didn't do well.

DDD: **SGCH** CAPRIKORN DAVID EXTRA ALOHA 6\*M **#405 LA-92**

9th place at Nationals!

02-01 305 3047 92 3.0% 86 2.8%

12 place 2 yo. At Nationals, defeating HEAT WAVE, who was 13<sup>th</sup>.

Did 16.8 lb on 4/27/22, maybe still have milk at Nationals.

PELE is a freak. She towers over our other 2 year olds. She will probably be our next 5,000 lb doe, because she is dcoming close to that in her two year old lactatation. And SHE SHOWS.

**SHE'S A GRADE, NOT A SAANEN.**

Her doe kids will be Saanens. Her buck kids cannot be registered.

She got the second highest LA of the YEARLINGS. (Yearling LA's are lower than the scores for mature does)

Her yearling RUH (Rear Udder Height)

was 46. Highest in the herd **BY 4 POINTS.**

Overpriced because Alice makes us go to 4 shows a year and Scott wants to give her a chance.

In 2023, she beat all the other yearlings on Official Test in October, November, and December DHI Tests.

Miracle: teats in right place

First leg under Scott Bice at the MDGA Summer Show.

Defeated 21 milkers on Aug. 2, 2024 to go grand.

As of November 2024 PELE has the highest Average 305 day Mature Equivalent for Butterfat in the Caprikorn Herd with 233 pounds, far ahead of DE LE FROMAGE **TOP TEN** with 205 and the third place NO HO with 195.

She also has the second highest Average 305 Mature Equivalent for Protein with 139, two pounds behind DE LE FROMAGE **TOP TEN** .

In handicapping the USDA figures for your future milk checks, you have to figure that if she had not been dragged out to four shows, her milk would have been up by maybe four hundred pounds plus or minus.

Probably going to sell one \$3,000 buck kid after another to our dairy farmer customers.

Scott says “S’ALOHA built great as a kid, but everything changes when the mammary comes out.”

We tell you all the bad stuff as well as the good stuff. Scott can’t stand the rump. It has a little rise and a roof. She is a PELE daughter, who Scott thinks of as our best overall doe. So he wanted to lower PELE’s price. However, Todd Biddle, a highly respected judge, put S’ALOHA 4<sup>th</sup> overall of 16 milking yearlings at our in-house evaluation.

DD: CAPRIKORN CZARAGTE FROMAGE 99<sup>th</sup>%ile 1714218

TA DA -August 2021

THE USDA DHIA COMPUTER PROGRAM MAKES FROMAGE 99<sup>th</sup> PERCENTILE!  
Because she has great lactations?

NO!

Because the computer knows the lactations of all her relatives and they are beating their herdmates.

FROMAGE 99<sup>th</sup> percentile GENETICALLY!

Update - 98! But REL 75 Excellent!

No use looking at her lactations, one side of mammary ruined. Computer knows her relatives. So the computer knows her percentile is 99!! Better genes than 99 of 100 Saanens. Most dairy farmers don't understand "GENES." So they don't buy her kids. So we have a lot of kids left here and they are doing great for us. FROMAGE gave us TWO 5,000 lb does! KASHTA and JE FROMAGE **TOP TEN**

DDD: XTORT

32,444 lb lifetime.

Todd Biddle, National Show Judge, puts SON (pronounced SAAN as in Saanen) 13<sup>th</sup> of 16, April 19, 2025. Based on "not enough udder support."

As a kid, she was 2<sup>nd</sup> of about 25.

So she looks like a fabulous doe for a dairy.

**CAPRIKORN PRO NO SO**

#4147

AS2389669

Born 04/03/24

American Saanen

PAGE ONE: PROSECCO: sire of NO SO

SS: LEVI was very heavily proven before we paid to drive his son PROSECCO from CALIFORNIA to MARYLAND on the East Coast.

Percentile 97-better production genes from 32 out of 33 Saanen bucks

PTAM 363-Compared to the average Saanen buck with daughters on test, he increased production by 363 pounds in 305 days.

REL 62 Very good Reliability for production

PTAFS minus 0.2

PTAFS REL 59 Pretty accurate rating for the minus 0.2

S: LEEVI PROSECCO-born in 2022; driven from California to CAPRIKORN.

*Any buck we bring in from an outside herd will lower our milk! Why do we do it? Because otherwise we become too inbred and bad things happen in the offspring.*

SD: **KARASI-TOP TEN** from a small California herd that cares quite a bit about show so they cannot compete with us in milk. LA-92! Well built. 90<sup>th</sup> %ile as of Nov. 2024 (out-milks 9 out of 10 tested Saanens).

PAGE TWO: NO HO, dam of NO SO

DSS: ECLIPSE HOPS \*B

DS: WINKEEPER: \*B a proven buck with numbers that could be enough to be #4 in the U.S.

DSD: WINSINGER 5\*M

D: CAPRIKORN WIN'S NO HO (#149) 99<sup>th</sup> percentile!

**Knocking down an amazing 2,876 lb in 303 days STARTING AT ONLY 11 MONTHS OLD.**

341 3480 3.7 130 3.0 104

2-04 304 **4560** 3.8 172 3.0 136

3-04 285. **4250** 3.9 165 2.9 124

Ben Rupchis says, "LEEANN could have won the 2-year old class at Nationals."

DS: CAPRIKORN ECLIPSE HERCULES

Good rump angle, Powerful. VG all around. Very friendly. This is a very well built buck. Scott guessed that he would appraise **92** when he grew up. Then we foundered him.

HERCULES is a proven buck.

When you do the USDA math - as of March 2022

Milk times a factor of .031 plus fat times a factor of .80 plus protein times a factor of 2.0,

He beats BULGING EYE, who is currently rated #1.

D: CAPRIKORN HERC KASHTA 4\*M #827

DD: SG CAPRIKORN CZARGATE FROMAGE 3\*M #537

American Saanen 97%ile as of June 2017, Yearling LA +VVV 85

01-00 305 2476 83 3.4% 77 3.1% awesome baby lactation

Now this is a half sister of CUMIN, who out-milked the entire herd three straight years.

And EXTRACT #490, who was KILLING them as a yearling, and beat 4,000 as a 2 y.o.

FROMAGE was looking good, now chronically lopsided due to severe mastitis Maybe

FROMAGE will mother the buck we are looking for.

As of March 2022, KASHTA's PTAM is 600 and something.

The milkiest active buck in USDA's computer bank is 300 and something. Only a couple of those. If a dairy getting \$50 per hundredweight could increase their production by 300 pounds per doe that equals \$150 dollars per doe each and every year.

So milking 100 you pick up \$15,000 a year. Milking 1,000: \$150, 000.

We will breed him to a lot of does and he will radically raise our milk production.

Also his sons should sell for more than our usual buck kids. Also we'll hope for maybe 400 straws of semen selling at 30 per straw.

What we need is an export semen deal with a large commercial dairy.

PAGE TWO: *Geneology* of SEXY PASTA's DAM: KEBAB RAVIOLA

First 4 yearling tests: 7.6, 6.8, 8.8

SS: SG ZEPPPO +\*B LA-90

Young Stock Final Score "V"(Just missed Ec)

**#3 All-time on the USDA Top Buck List** DEC 2016 LA-90 #11 on Dec

ZEPPPO's dau's are BIGGER, AND THAT IS IMPORTANT TO US. Because a 16 lb milker that is small is more likely to give a dairy farmer health problems. But a 16 lb milker that is BIG can handle it.

ZEPPPO is Mr. Protein. He has the second highest protein % of any of our bucks, ever. The winners of the Four Milk and Fat Awards at the 2016 Nationals were both ZEPPPO dau's. Also the 2017 305 Milk & Fat Awards, and the 2017 Lifetime Awards.
